[BA-0801-CS-RM-01-OS: Requirement Management for Software Development \[16 PDU's\]](#)

RELEVANCE TO SOFTWARE DEVELOPMENT INDUSTRY

The software industry is replete with examples of software end-products that do not conform to what the customer originally wanted. In hindsight, most of such failed projects have realized that the software requirements needed to be better managed to achieve the desired level of customer satisfaction. On detailed analysis, the highest cost of “fixes” was also attributed to the requirement defects that were allowed to trickle down to later phases of the project.

This course will help you learn about the significant role requirements play in defining the solution to implement software enhancements or new product features. You will gain insight into definition of scope of work, elicitation and development of functional and non-functional requirements. Part of this course will also deal in management of changes in requirements through the life cycle of the project/product, advantages of maintaining requirement traceability and maintenance of requirements for re-use.

YOU SHOULD ATTEND THIS COURSE IF YOU ARE...

...a Business Analyst and your end-objective is to maintain high 'Customer Satisfaction Index' with the software end-product.

...a Business Analyst and you intend to institute a mechanism to handle ever-changing requirements.

...a Business Analyst and you need to escalate changes to your team members with speed and accuracy.

...a Project Manager and you have a mandate to avoid 'Scope Creep' on your project.

...a Project Manager and you must ensure quality without adversely affecting your budget.

...a User of Software End-Product and you wish your software team minimized the cost of re-do's.

...a Non-IT Professional and you aspire to kick-start your career as a Business Analyst on application software development projects.

WHY SCIENT-RIVER?

- Competent Team of Trainers
 - ✓ Highly qualified – MBA's, PMP's, Six Sigma Black Belts, Scrum Masters
 - ✓ Chief Trainer co-authored the very first edition of Business Analysis Body of Knowledge (BABOK) ***
 - ✓ Hand-picked to meet the stringent selection criteria of SRCI
- Program development specialists engaged in continuous improvement of the course content
- Application-oriented course exercises
- Commitment to share knowledge that lasts beyond the course
- Training Design Imperatives – To succeed both in competition and execution in the real world

WHAT VALUE WILL THIS COURSE DELIVER?

- Award of Certificate (endorsed by International Institute of Business Analysis - IIBA)
- Award of 16 PDU's (Professional Development Units) by IIBA
- Comprehensive Study Guide for each student
- Exclusive and free subscription to Scient-River Newsletter
- Entry into ready-reference database maintained by senior consultants for inside scoop on future job opportunities

***A de-facto standard for the aspiring Certified Business Analysis Professionals (CBAP's) all over the world.
